# Certificate

**RITTAL enclosure systems LTD confirm that:**

**HMT Switching and Control Engineering Ltd**

**Is qualified to assembly Ri4power systems with the following device**

**ABB, Schneider Electric, General Electric, Eaton, Siemens, Tersaki, Mitsubishi  
Allen-Bradley**

**UP TO 5500A And ICW=120KA 1SEC**

**HMT is obligate to assembly ri4power system according  
to RITTAL assembly instructions**

Ri4Power Form 1-4 – An individual system for the configuration of tested low-voltage switchgear with inner Form separation. The flexible combination of Ri4Power field types supports optimum configuration for a wide range of applications. Ri4Power Form 1-4 offers a very high level of operator protection. Thanks to extensive busbar insulation and subdivision of the compartments, the occurrence and spread of accidental arcing is largely prevented.

Design verification to the internationally valid standard IEC 61 439-1  
Tests with ASTA certification  
Protection category up to IP 54  
Tested accidental arcing protection to IEC 61 641  
Additional preventative accidental arcing protection

Validity of certificate :

1.1.2019

Best Regards,

Yakov avraham

Electrical Systems Division Manager
